WORK EXPERIENCE & RELEVANT SCHOOL PROJECTS

RELEVANT SCHOOL PROJECTS

France

Quantitative Portfolio Management Strategy | SKEMA

2026

- Backtested a Multi-Asset ETF strategy using Fama-French factors and CAPM to isolate alpha.
- Optimized portfolio weights to maximize Sharpe Ratio under strict diversification constraints.

Cross-Asset Market Regime Monitor | SKEMA

2025

- Engineered a Python dashboard to visualize Bond Yield Curves (US/EU) and Futures Term Structures.
- Implemented automated daily data pipelines to detect Inflation/Growth regimes and track cross-asset performance.

Equity Research & Valuation | IAE Lille

2023 – 2025

- Pitched Buy/Sell recommendations on several stocks based on DCF and Multiples valuation.
- Analyzed macro-economic sensitivities and financial ratios to assess downside risk and intrinsic value.

NXP Semiconductors

Nijmegen, Netherlands

Software Engineer Intern (Python Automation)

2019 – 2020

- Engineered a Python automation framework to replace manual workflows, significantly reducing process latency and operational risk in a high-throughput testing environment.
- Developed a scalable Data Manipulation API to standardize verification protocols, improving data integrity and accelerating delivery times.
